

Ta3awen: How Reservations Work

Step 1 of the plan - in plain words

Someone posts a chair. You want it. You RESERVE it.
Now nobody else can take it. The owner hands it to you, presses a button,
and the chair is officially GIVEN. Simple!

The 3 stages of a listing

The rules, in kid words

1. Any signed-in user can reserve an available listing - except its own owner.
2. Reserved things leave the feed, so nobody can double-take them.
3. Only the owner can press 'Confirm delivery' after handing it over.
4. You can cancel your reservation - and so can the owner, if plans change.
5. After delivery, the card remembers WHO received it. That builds trust.
6. Two people tapping Reserve at the same time? The rules pick one winner.

A little story

Ali posts an old bicycle. Sara opens the app and taps 'Reserve this listing'.
The bike disappears from the feed. Ali meets Sara, and hands her the bike.
Ali taps 'Confirm delivery'. The bike now says GIVEN, and remembers Sara.
